Help Scott become a shape-o-naut: connect the dots!

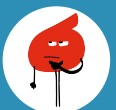

Great job!

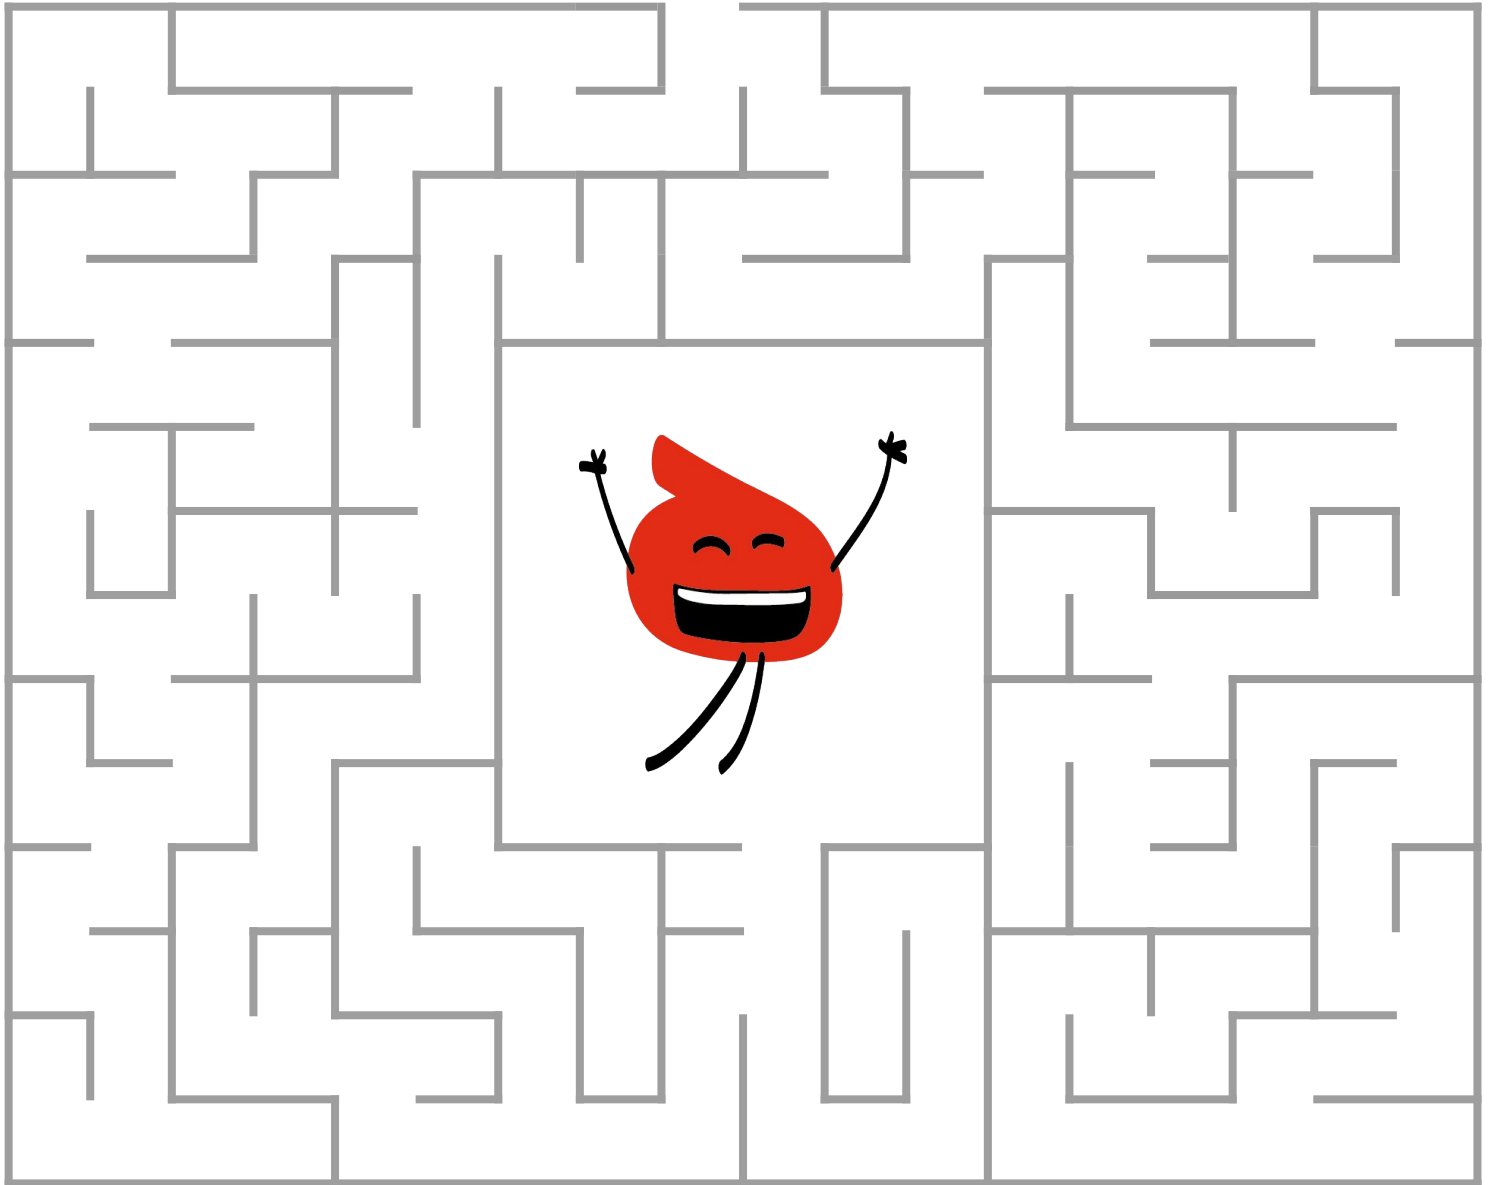

Carolines and Scotts – Play with a Friend!

Take turns drawing horizontal or vertical lines between adjacent Scotts connecting them together. No diagonals! If you complete a full square, write your initial in the box. If your line creates two boxes you get both of them. In both cases you get 1 extra turn. When all the Scotts on the page are connected count how many boxes each player has.

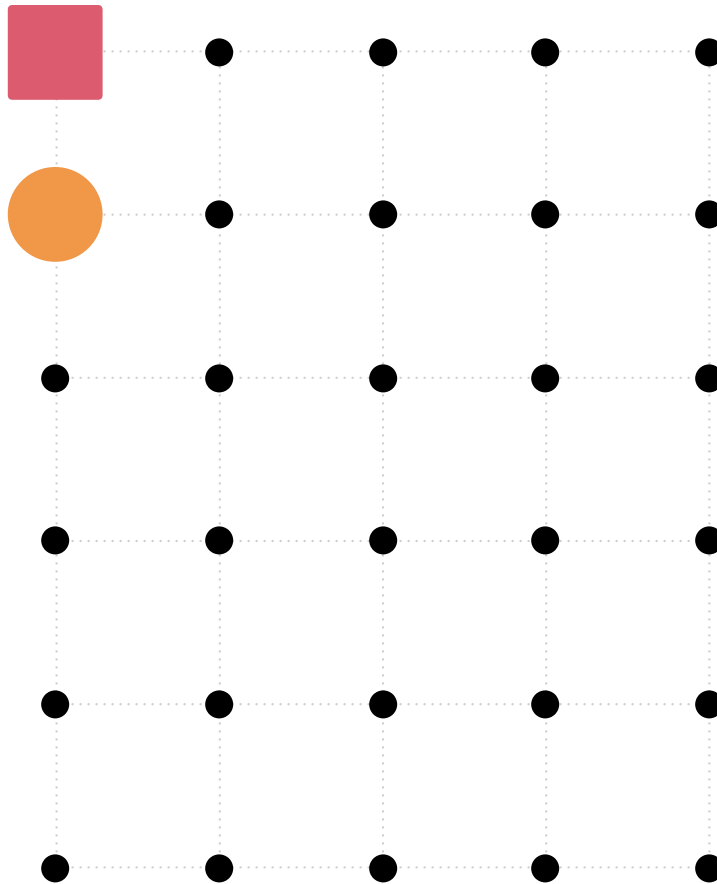

Help Scott the Dot get out of the maze!

Well done!

Plot Those Scotts!

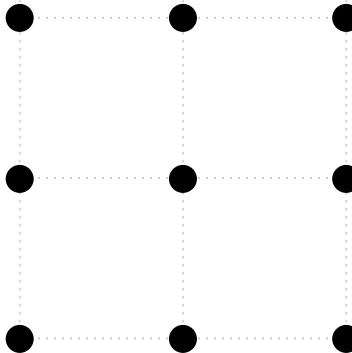

Claire the Square wants to visit her friend Urkel the Circle but she can only get there by visiting every single Scott. She has to walk on the dotted paths in one continuous line and she mustn't cross any lines she's already drawn. Can you help Claire get there?

Extra credit - this is a hard one!

In this puzzle, you must connect all the Scotts using only 4 straight lines; without lifting the pencil (so that each new line must be connected to the previous one).

Each line can be as long or as short as you see fit;
and a Scott may be crossed by multiple lines.
